Control Your Comfort From
Anywhere with the Convenience
of Remote Access

Innovation and the Environment

Over 100 years ago, a humble but determined engineer solved one of mankind's most elusive challenges by controlling the indoor environment. A leading engineer of his day, Dr. Willis Carrier would file more than 80 patents over the course of his career. His genius would enable incredible advancements in health care, manufacturing processes, food preservation, art and historical conservation, indoor comfort and much more.

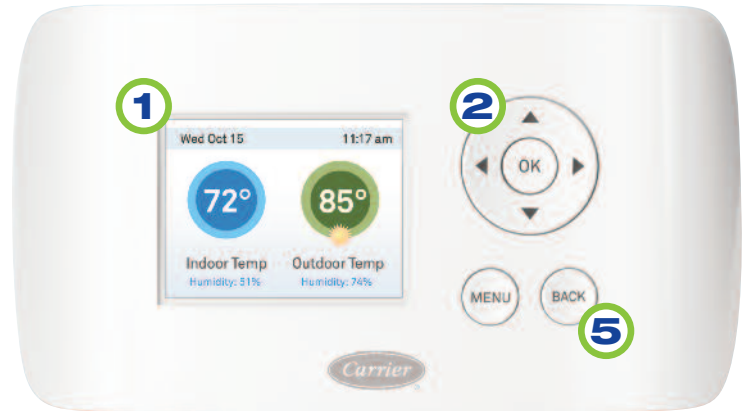

Carrier's foresight changed the world forever and paved the way for over a century of once-impossible innovations. Yet in addition to being an accomplished inventor, he was also an avid outdoorsman. Carrier recognized the power and beauty of the natural environment. This appreciation of our world and its resources continues to guide Carrier Corporation today. We will never rest on our accomplishments, but instead consistently look for ways to improve our products, our environment and our world.

With our Carrier® Wi-Fi® thermostat, Carrier offers convenience and affordability in one wall-mounted control. Offering remote connectivity to your system from any internet-connected device, this thermostat helps merge today's active lifestyles with the need to maintain a comfortable home.

Leaders in Technology

As long as you are connected to the web, you are connected to your home comfort.

1 Vivid Display

Full-color graphics provide comfort information at a glance, including indoor temperature and humidity set point, outdoor weather, network signal strength and more.

2 Responsive Control

With push-button navigation, set-up and operation are easy. The vibrant backlit buttons allow you to quickly adjust your comfort settings.

3 Ultimate Convenience

Remote access to your home comfort system from multiple devices is easy and convenient using our free mobile apps or your personalized web portal. From your desktop to the palm of your hand, this thermostat can be controlled from practically anywhere.

4 Secure Online Access

Our secure web portal lets you set-up, manage and adjust your system from any internet-connected device. And while you're there, get system reminders, weather updates, and home energy use reports as well.

5 Built-In Smarts

Set up your Wi-Fi® thermostat, walk away and let its advanced software do the thinking for you. This "smart" control monitors your home's energy use, your comfort preferences, and the weather forecasts to make wise choices on efficiency and comfort for your return home.

It's About Your Comfort

Sure, this programmable thermostat sits on your wall like so many others. But that's where the similarities end. Advanced software makes everything easy, from initial setup to customizing your comfort schedule to connecting to your home's network. Then, it gives you the power to control features and functions remotely from a computer, tablet or smart phone.

At the office or on the road, you can alter your home's heating and cooling settings for comfort upon arrival using your connected device. And while you're away, you'll be comforted to know that as conditions change at home, you are just a few clicks away from averting issues associated with extreme swings in the weather.

Along with the incredible convenience of remote operation, our web portal delivers automated alerts and reminders. Monthly energy use reports help you make the connection between your thermostat settings and your utility bills. Because it's a smart thermostat, it monitors factors like weather and system usage, then makes adjustments to maximize performance. And, to be sure your system has the latest features and functionality, software upgrades will be available at no additional cost.

Convenient and affordable, the Carrier® Wi-Fi® thermostat adds a new dimension to your comfort – the power of connectivity.

Limited Warranty

To the original owner, the Carrier® Wi-Fi® thermostat is covered by a five-year parts limited warranty upon timely registration. The parts limited warranty period is three years if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty period. See warranty certificate at carrier.com for complete details and restrictions.

Carrier® Systems for Unmatched Performance in Every Season

Willis Carrier's meticulous attention to quality and detail led to a major culture shift in the way we live indoors. More than a century later, Carrier Corporation operates with a unique willingness to develop new technology, the confidence to revise proven designs and the ability to deliver results with every new installation.

Part of that equation is our nationwide network of experts you can turn to for all of your indoor comfort needs. Your local Carrier® dealer is well equipped to evaluate your home – everything from size, window placement, ductwork, venting and other structural specifics – and create a customized system designed around your lifestyle. So when it's time to make a choice for your family's comfort, make the best decision you'll ever make – Carrier – and let the experts do the rest.

The Total Indoor Comfort System

Air Conditioner provides reliable, high-efficiency cooling for long-lasting comfort and energy savings.

Gas Furnace provides reliable, high-efficiency heating for long-lasting comfort and energy savings.

Evaporator Coil is matched with the proper outdoor unit to provide top heating and cooling efficiency and years of reliable service.

Air Cleaner improves air quality by removing harmful and irritating airborne pollutants in your home.

Ventilator combines fresh outdoor air with conditioned indoor air for improved air quality and maximum efficiency – great for today's tightly constructed home.

Humidifier replenishes moisture to dry air.

Zoning sets different temperatures for up to eight different areas of your home for truly customized comfort and enhanced utility savings.

UV Lamp inhibits the growth of contaminants on the indoor coil, leaving your home with cleaner, fresher indoor air.

Wi-Fi® Thermostat offers precise, programmable comfort from your web-connected device.
